Cattle Calls Sluggish at Gates, So Airlines Try to Pick Up Pace
By JAD MOUAWAD
Published: October 31, 2011
It's the common tale of woe for many travelers waiting to board a plane. First the airline has to go through a long list of passengers who have priority: First- and business-class passengers, frequent fliers, elite card holders, uniformed members of the military, families with children, those who hold credit cards affiliated with the airlines, passengers who paid for priority seats.
By the time coach travelers are called, the overhead bins seem to be already full.
Airlines have been boarding passengers since the first commercial flight, but as they have added new classes of seating to their cabins and new fees for

How did American artists represent the Jazz Age? The exhibition Youth and Beauty: Art of the American Twenties brings together for the first time the work of sixty-eight painters, sculptors, and photographers who explored a new mode of modern realism in the years bounded by the aftermath of the Great War and the onset of the Great Depression. Throughout the 1920s, artists created images of liberated modern bodies and the changing urban-industrial environment with an eye toward ideal form and ordered clarity—qualities seemingly at

About
Informed Individual
is a volunteer, non-profit organization. Our goal is to strenghten the individuals ability to make choices according to their own values. The organization is working with building an information-infrastructure that separates data, interpretation and distribution. We will also work for the public availability of data that is necessary to make conscious and informed choices - for instance data related to companies, products and product ingredients.
Contact Informed Individual
if you have any questions, we appreciate it if you contact us. For technical requests contact rune.forberg@informedindividual.org, and for other requests contact oystein.jakobsen@informedindividual.org

graduates to flourish in an increasingly interconnected world.

What They Needed

With dozens of subsites supported by hundreds of content contributors, Barnard needed an elegant, agile solution for maintaining and updating their Web presence. Palantir worked closely with Barnard to develop a solution that not only enabled site administrators to oversee the school's entire site, but also empowered non-technical contributors to easily update content within their own individual sections.

Each one of Barnard's nearly 50 departments and programs has its own subsite, maintained by its own set of content contributors and editors. Each one of these sites needed to have its own unique visual identity, while still fitting into the overall Barnard branding.

Many of Barnard's content contributors and editors are responsible for multiple "sections" of the site that don't necessarily correspond to the site's menu system or information hierarchy. Some content contributors have their copy reviewed by one or more editors before it it is published live on the site. Barnard needed a way to assign rights to various types of users so that content could be created, reviewed, revised, and published across sections of the site

John Albin Wilkins
Mutant Hybrid Developer/Themer
John has a BS in Computer Science from the University of Illinois, Urbana-Champaign, where he developed his first Web site in 1994. John has extensive HTML, PHP, Perl, and Javascript knowledge and is the maintainer of the popular Zen theme for Drupal. John has worked on projects for Palantir clients such as the University of Chicago Law School, the Herron School of Art and Design at Indiana Unversity-Purdue University, and Washington University in St. Louis.
What do you do outside of Palantir?
Usually just wait around for someone with a key to show up. (They haven't given me a key to the office yet.)
Star Trek or Star Wars?
Star Wars... right up until Greedo shot first. Am I allowed to mention Babylon 5?
Voted "most likely to"...
Create a novelty Drupal module.

Drupal 7 Media Sprint

by Dave Reid

SEP 26, 2011

Drupal Modules Media
Drupal Planet Acquia

2 Comments

This past Saturday, the 2011 Drupal 7 Media Sprint in Chicago officially started. For those unfamiliar with the Media module, lead by Aaron Winborn, it provides an extensible framework for managing files and multimedia, regardless of whether they are hosted on your own site or a third-party site. Media handling is typically a lacking feature in Drupal core and the Media module intends to be a usable, friendly, and flexible solution for a wide range of users and use cases.

Why are we having a sprint?

The last media sprint was in New York City near the end of 2009. Before and after the release of Drupal 7.0 at the beginning of 2011, both the Media module and the many other modules that integrate with it have been lagging behind in development and stability; it has been in beta for almost a year with some large beneficial, but painful changes in that time. Not having a stable and "ready" Media module is a big factor as to why many potential users and clients are not adopting Drupal 7 sooner or quicker.

Acquia has helped drive improvements to Media as a part of their successful efforts to include it in Drupal Gardens. Their efforts included massive interface and usability improvements resulting in the current media browser, and standardizing on enabling Drupal core's native file entities to become field-able and re-using core's file and image fields.

Dave Reid

Dave is an experienced Drupal developer and community member. In addition to maintaining numerous modules, he is also one of the leading contributors to Drupal 7. Dave is an active member of the Drupal security team, and helps to maintain the drupal.org website and code repository. Dave provides consultation, development, and programming services. An Omaha native, he's also a big fan of the Nebraska Huskers. Dave provides consultation, development, and programming services.

« Responsive IMGs: Choosing between semantic markup and working code

Device detection as the future friendly img option

October 31st, 2011 by Jason Grigsby

Last week I wrote about why I was considering teaching the noscript technique in our book and asked for someone to talk me out of it before I committed what I feared would be a long-lasting crime against web development.

The post worked. I got some great feedback, and I've decided against using noscript in the book.

Instead, I'm going to use Sencha.io SRC (aka TinySRC) in the book. Much to my surprise, it seems like the most future friendly option.

The problem with the noscript version

Sometimes I need something explained to me multiple times before I get it. Understanding why using noscript was a problem for semantic markup was one of those times.

Fortunately, Stephen Hay got through my thick skull with this paragraph from an email he sent:

How do you do this for mobile?

Don’t.

@wilto
Mat “Wilto” Marquis

“Mobile users want to see our menu, hours, and delivery number. Desktop users definitely want this 1mb png of someone smiling at a salad.”

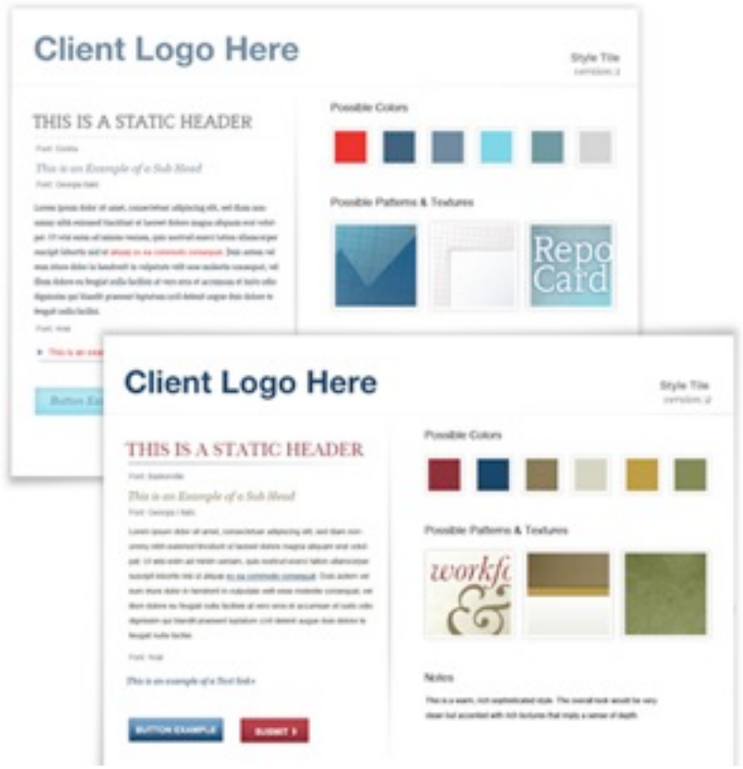
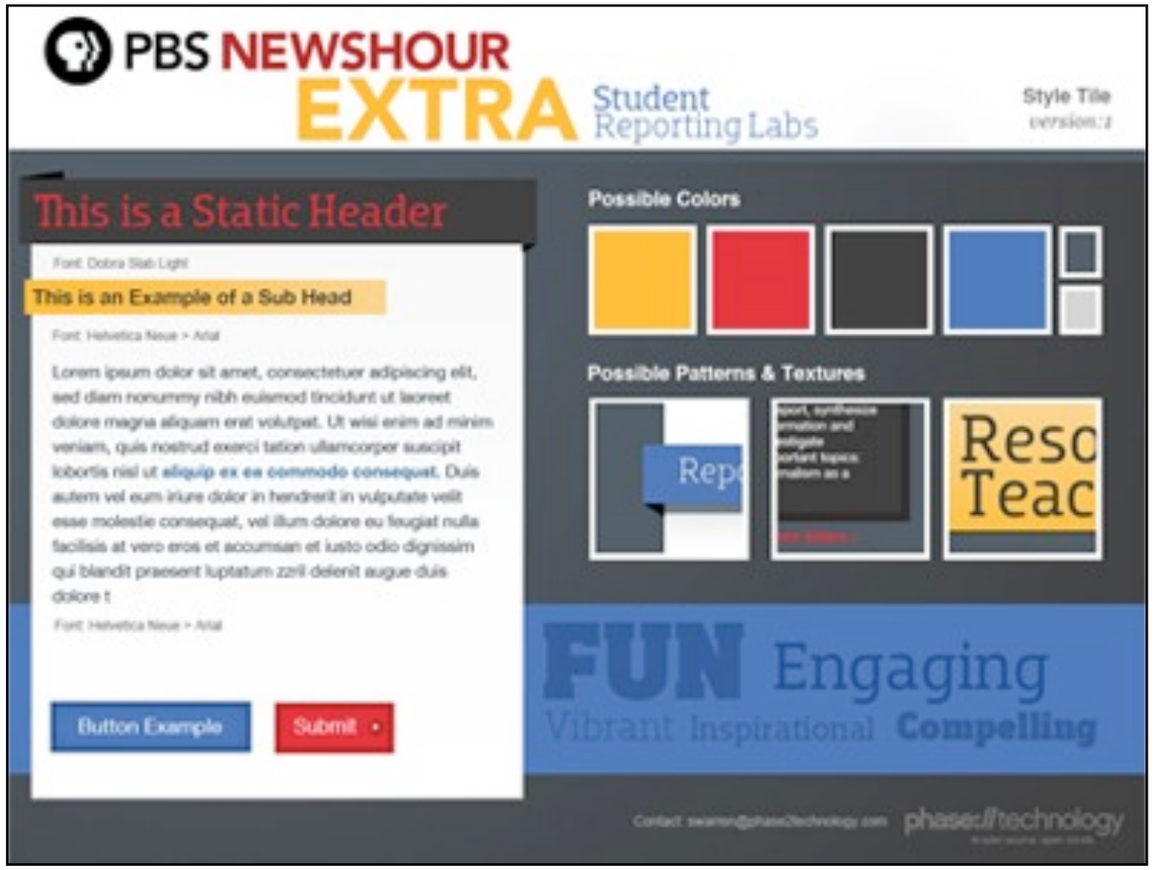
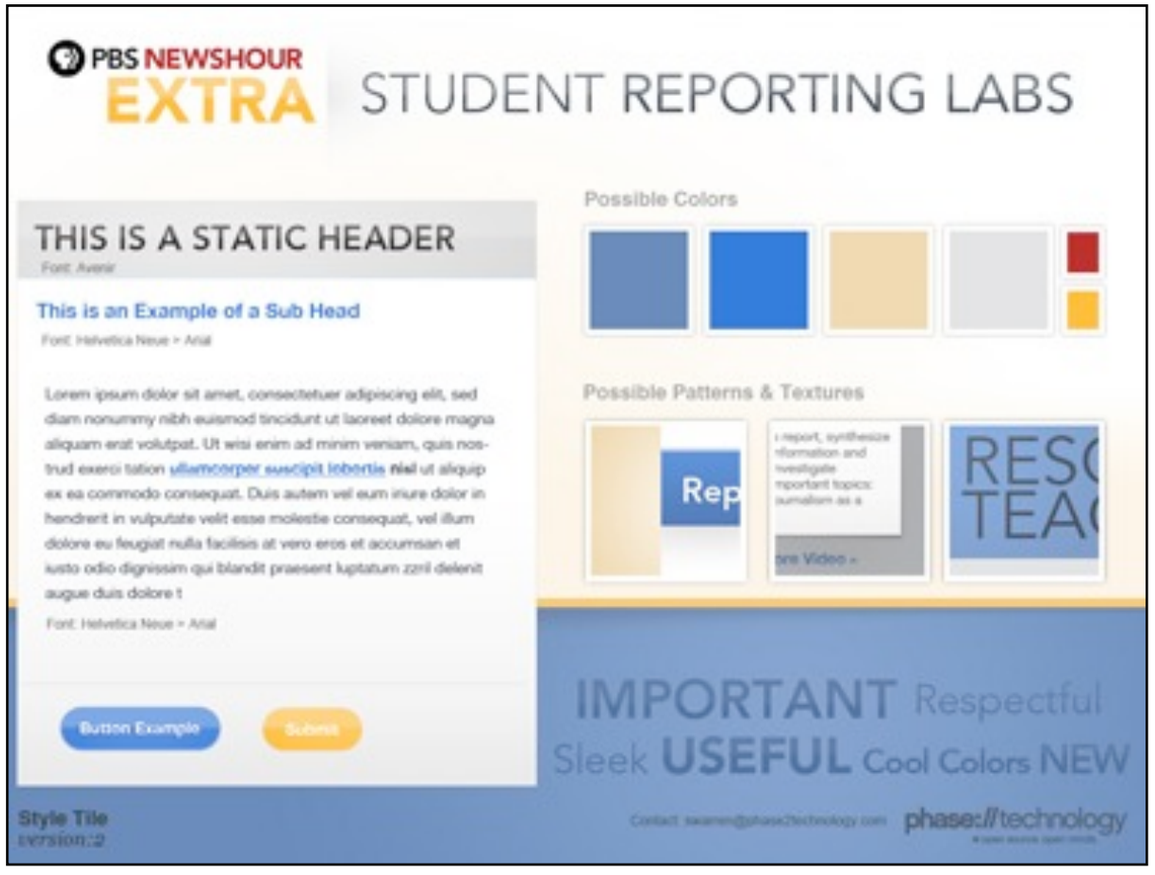
Style Tiles

Samantha Warren
@samanthatoy



The style tile is not a literal translation of what the website is going to be, but a starting point for the designer and the client to have a conversation and establish a common visual language. When a client says "clean," does she mean Apple.com clean or NYTimes.com clean?





Simple Buttons

Foundation buttons have a number of parameters and styles - you can see a few examples below. The out of the box classes include size, color and style (square, slightly rounded, and completely rounded).

Alerts

Alerts are a handy element you can drop into a form or inline on a page to communicate success, warnings, failure or just information. The syntax is extremely simple and like anything else in Foundation, easy to customize.

This is a standard alert (div.alert-box). ×

This is a success alert (div.alert-box.success). ×

This is a warning alert (div.alert-box.warning). ×

This is an error alert (div.alert-box.error). ×

Interested in Working With Us?

Bacon this is the next step you can take. Including something contact form.

At Palantir, we're not rock stars, ninjas, monkeys, or Jedi (even though we like all of those things). Think of us like like an orchestra made up of virtuosos who sound kick-ass playing together in perfect harmony. For us, it's all about the team and what we can accomplish in collaboration with each other, our clients, and our partners.

Crafting Rich Experiences with Progressive Enhancement

by Aaron Gustafson

Foreword by Jeffrey Zeldman

> Adaptive Web Design *not only provides the clearest, most beautiful explanation of progressive enhancement I've ever read, it's also packed full of practical know-how pumped directly into your neocortex through Aaron's warm and friendly writing style. If you aren't already using progressive enhancement to build websites, you soon will be.*

Patrick urges patience as crews work to restore power

Governor Patrick said crews were "making progress" on restoring power, but officials warned outages could last until Friday.

DAVID BUTLER

State of fear: Four haunting Mass. tales

It's the season when the spirits come alive, and Massachusetts abounds in scary tales. Here are four of them. 1 minute ago

In some towns, Halloween is postponed due to storm

Dozens of towns and cities in Massachusetts have postponed trick-or-treating in the storm's aftermath.

State to probe drunken driving acquittal rates

The state's highest court opened an inquiry following a Globe Spotlight investigation into high acquittal rates in trials presided over by district court judges.

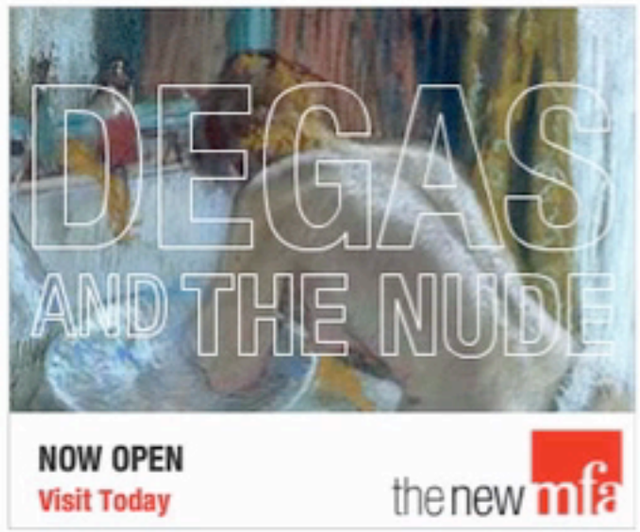
- **Spotlight report: For drunk drivers, a habit of judicial leniency**

Herman Cain decries 'witch hunt'

The GOP presidential candidate said allegations that he sexually harassed women in the 1990s were false.

Groundbreaking mayor losing favor

After helping pull Fitchburg from the brink of bankruptcy, Mayor Lisa Wong is being criticized for cutting and saving rather than spending some of that money.



"

"This bullseye on my back has gotten bigger. We have no idea the source of this witch hunt, which is really what it is."

Herman Cain, GOP presidential candidate
