

Windows PowerShell

Jeffrey Snover
Partner Architect
Microsoft

Apologizes and Homage

Sorry

GUI-Centered World

Sorry

CMD.EXE

Sorry

VBSCRIPT (for admins)

Sorry

BASH + Awk +... approach doesn't work
on Windows

Sorry

Yet Another Language

I Love

- Composability
- Commands, utilities, interactive/programmatic shell
- Discoverability
- Ubiquitous remoting
- Simple ad hoc scripting

Unix + Bash + ...

I Love

- Production mindset
- Single parser
- Data validation
- Naming guidelines
- Useful error messages

DCL & CL

I Love

- Embeddable engine
- TK
- Domain-specific languages => domain-specific vocabularies

TCL

I Love

- CPAN
- Sophisticated scripting

Perl

I Love

- Reflection
- Attributes
- Huge and growing library

.NET

Windows PowerShell

Mission

Deliver a composition **toolkit** and scripting **language** to a wide range of **users** to easily implement solutions with the right level of **quality**

A | B | C

Composable Models

- UNIX:
 - ASCII files => sed, awk, grep, etc
- SQL:
 - Tables => join, query, groupby, etc
- .NET:
 - Object => PowerShell

Standardization =>

domain-neutral utilities for composition and manipulation

Windows PowerShell

New command-line shell and scripting language

```
C:\Windows\System32\WindowsPowerShell\v1.0\PowerShell.exe
PS C:\> Get-PSProvider

Name      Capabilities      Drives
-----
Alias     ShouldProcess     {Alias}
Environment ShouldProcess     {Env}
FileSystem Filter, ShouldProcess {C, D, WIN, Fav...}
Function  ShouldProcess     {Function}
Registry  ShouldProcess     {HKLM, HKCU}
Variable  ShouldProcess     {Variable}
Certificate ShouldProcess     {cert}

PS C:\> Get-WmiObject Win32_ComputerSystem

Domain           : ntdev.corp.microsoft.com
Manufacturer     : Dell Inc.
Model            : Inspiron 9300
Name             : JPSVISTA1
PrimaryOwnerName : jsnover
TotalPhysicalMemory : 2146279424

PS C:\>
```

- As **interactive** and **composable** as BASH/KSH
- As **programmatic** as Perl/Python/Ruby
- As **production oriented** as AS400 CL/VMS DCL
- Allows access to data stores as **easy to access** as filesystem

PowerShell books

PowerShell In Action

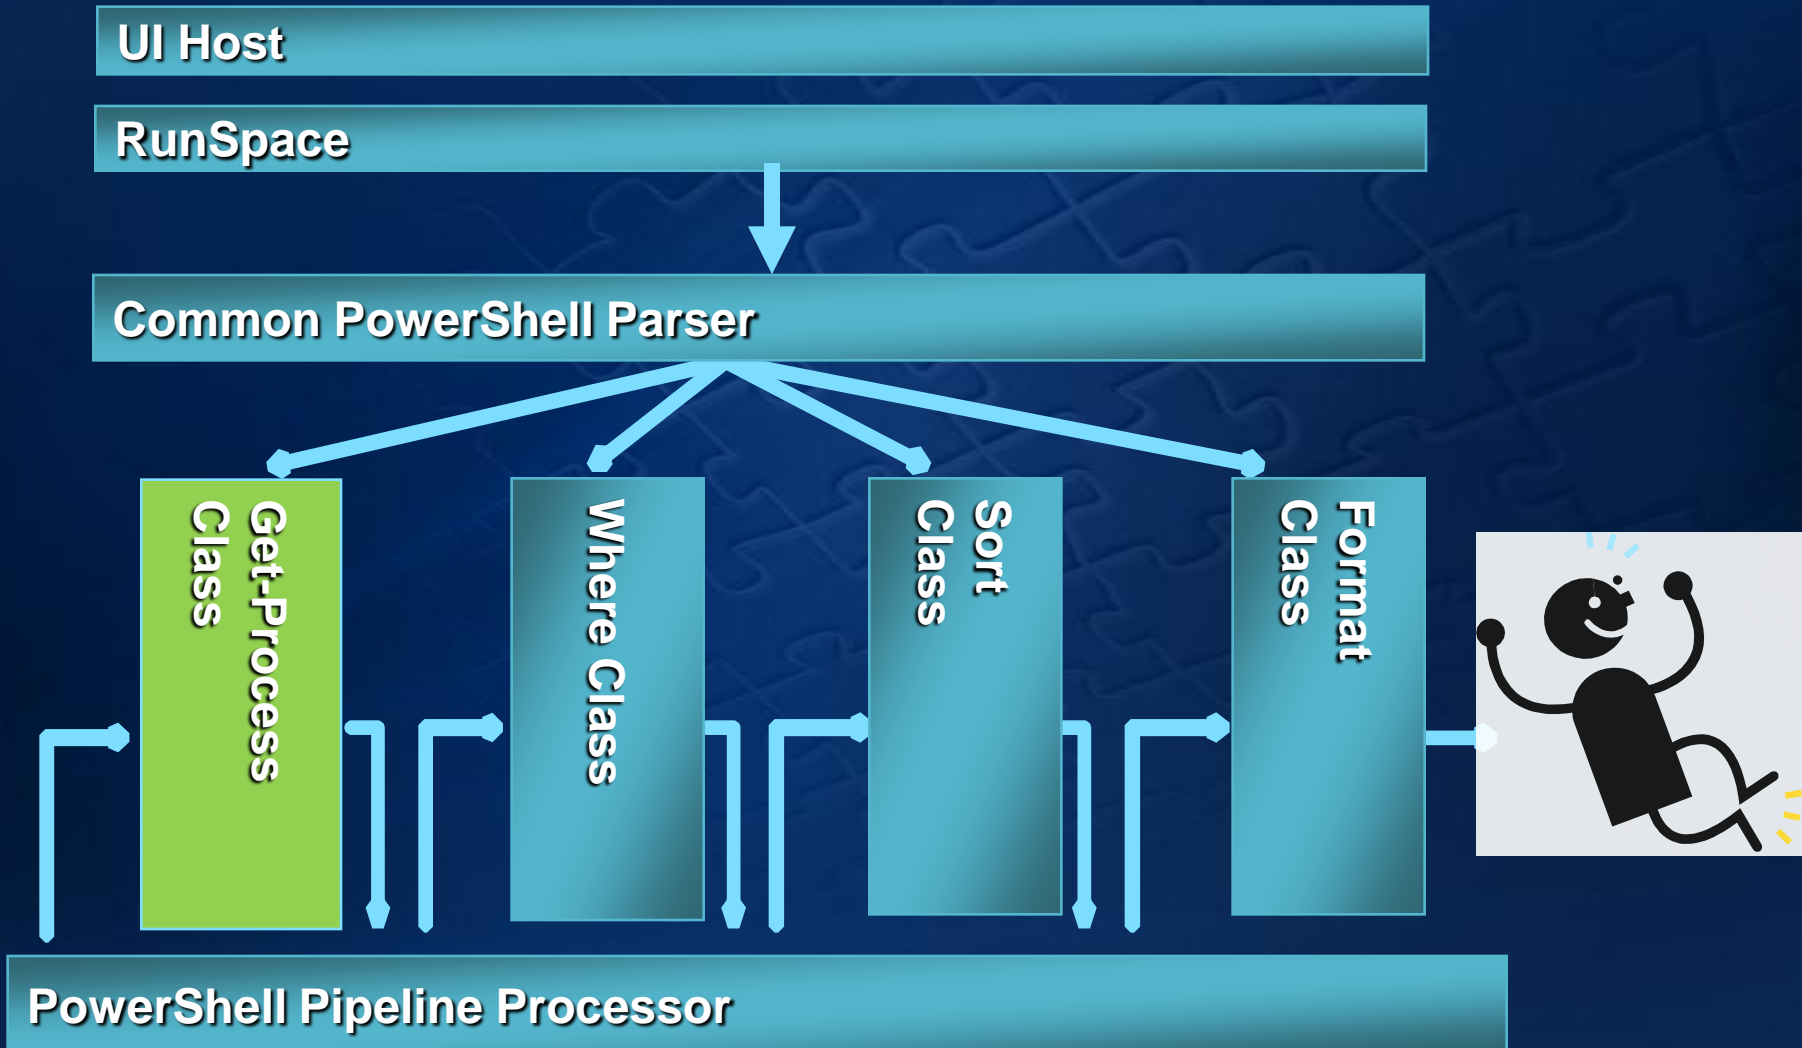

DEMO - Introduction

How It Works

Get-Process | Where { \$_.handles -gt 500 } | Sort handlecount | Format-Table

Universal Code Execution Model

- Expressions, Commands, and ScriptBlocks can run
 - In the foreground or background
 - On one or more machines
 - Over a LAN or a WAN
 - In restricted or unrestricted environments
 - Using short or long connections
 - Using impersonation or supplied credentials
 - Initiated by user input or by events

DEMO - UCCEM

Remoting

- 1-1 interactive
- 1->many fan-out
- Many->1 fan-in

DEMO - Scriptblocks

State Of The Software

Phenomenal rate of adoption

PowerShell Downloads

- Over 2.6 million downloads
- XP, Vista, Server 2003 and 2008
- Adopted by Exchange, SQL, SCOM, SCVMM, and SCDPM
- CEC 2009 requirement
- Dozens of 3rd party tools, ISVs, and partners
- Strong community engagement, 27 PowerShell MVPs
